

## Quality Policy

Purcom Química Ltda, which works with the development of polyurethane, polyols, isocyanates, and additives systems, directs its Quality Management System to:

- Meet customer's needs;
- Produce and commercialize quality products, according to applicable requirements;
- Train its employees;
- Continuously improve the QMS processes and products;
- Respect the environment.

## Quality Objectives

- Product quality;
- Client's satisfaction;
- Market expansion;
- Training of employees;
- Respect for the environment.

## Safety, Health and Environment Policy

- Reduce the risks to people's health and safety and strengthen the safety of processes;
- Take care of each other in the work environment and, when in doubt, stop and seek help;
- Prevent and minimize the environmental impacts of our organization and our products on the environment;
- Prevent, monitor, and control the impacts of our activities on the communities where we operate;
- Consider safety, health, and environment requirements in business decisions;
- Strengthen the culture of safety, health, and environment with a focus on education, training, and awareness;
- Seek alignment with the industry's best safety, health, and environment culture practices, in accordance with legislation, regulation and standards;
- Predict and promptly respond to emergencies;
- Require suppliers and partners to comply with the requirements and recommendations of safety, health, and environment culture;
- Continuously implement improvements in safety, health, and the environment.
